

TOPIC 2 - All About 2D World

STEP LIST - Making The basic 2D shapes

(using the basic shapes drawing tools)

To go to the drawing screens

1. Toggle to the 3 views

To Draw a Rectangle

2. Select the square, then click and drag to make a rectangle

To Draw a Square

3. Select the square, then click and drag to make a square

To Draw a Triangle

4. Select the triangle, then click and drag down straight, stop and release to make a triangle

To Draw a Circle

5. Select the circle, click and drag down to make a circle

You have now the 4 basic shapes sketched on the top view

6. Click on square and make a shallow rectangle in the front (only one unit high)
7. Make the rectangle long enough to match the overall width of all shapes in top
8. Click the Solve button to see your 2D shapes
9. You have your 4 basic shapes as 3D shapes in the thickness you chose
10. Select layers/then color palette to color them

You have now the basic shapes in the color of your taste

11. Right click on the 3D shapes to zoom in and out and with the left click to turn them around

To save your drawings

12. Click save
13. Save your file in your drawings folder
14. Name it 'basic 2D shapes'
